Context and approach

Baras faces recurring typhoons, storm surges and coastal erosion that force families into classrooms and barangay halls. Displacement disrupts schooling and health access for adolescents, who face stress, trauma and unmet health needs.

AHYD Organisation of Baras, with the local government, health and education agencies, will build a climate-resilient teen centre integrating disaster preparedness, adolescent health and livelihood services, run through youth-led training and campaigns.

Approximate project location.

Project outputs

- Construct and retrofit a climate-resilient teen centre with ICT and solar
- Train over 200 adolescents a year in DRR, leadership and sustainable skills
- Run awareness campaigns reaching 2,000 community members
- Integrate the centre into municipal DRRM and population plans
- Adolescents have a safe, equipped space during and after disasters
- Youth lead preparedness and reach the wider community with information
- Young people gain livelihood skills that reduce pressure to leave Baras
