TOTAL PROJECT VALUE
43,402 USD — 6 months

50%	CCF GRANT	21,701 USD
50%	MATCHING FUNDS Matching partner being confirmed	21,701 USD

Context and approach

Heavy rainfall floods and erodes the road into Rongnawo Village on North Maewo, cutting the community off from the ship landing and main road. Shop owners, farmers and church members carry goods by hand and homes, trucks and businesses suffer flood damage.

The community organisation will pave the worst stretch with concrete, build drainage channels and culverts using local labour, distribute maintenance tools and set up an inclusive road committee to manage weight limits and upkeep.

Approximate project location.

Project outputs

- Assess the road and map sites for paving and drainage
- Construct drainage channels and culverts with community labour
- Pave the flood-prone road section in concrete
- Establish an inclusive road management committee with tools
- Rongnawo keeps safe, reliable road access year-round
- Produce and goods move to market without flood interruption
- A community committee maintains the road and drainage

Reach & deliverables

120	1	1
ESTIMATED POPULATION IMPACTED Rongnawo Village	FLOOD-RESILIENT ROAD UPGRADE drainage, culverts and reinforced pavement	COMMUNITY ROAD COMMITTEE tools and maintenance responsibilities

Milestones

6 MONTHS TOTAL
